STAT
STAT

1. Attached is copy of the draft final report, "A Review of Trends in U.S. and USSR Nuclear Force Levels and Related Measures", for your retention and use. This is an updated version of a similar document produced by DNA in 1978. The draft is provided to allow early use of the information contained therein. A final printing will be available in the near future.

2. Due to the sensitive nature of the information contained within the document, although unclassified, this document has not been approved for general public release. Therefore, request the document not be distributed outside your immediate office without the concurrence of DNA. Additional copies are available and provisions can be made for additional distribution.

3. If you have any comments or questions, please contact LtCol Tom Gladstone, Contract Technical Monitor, DNA/NATA, Washington, D.C. 20305, (202) 325-7400.
